SUMMARY

Frontend Engineer with 4+ years of experience building scalable, high-performance React.js applications using JavaScript (ES6+), TypeScript, and Redux Toolkit. Experienced in component architecture, REST API integration, and performance optimization across enterprise financial platforms, reporting dashboards, and high-traffic consumer products. Consistently delivers enterprise-grade, responsive UIs within Agile teams.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3

Frontend: React.js, Next.js, React Hooks, React Router, Redux Toolkit, Redux, React Query, Context API

UI & Styling: Tailwind CSS, Material UI, Styled-Components, Responsive Design

Backend & Tools: Node.js, Hapi.js, REST APIs, Git, GitHub, Vite, npm, Chrome DevTools

Performance, Testing & Practices: Code Splitting, Lazy Loading, Query Caching, Jest, Unit Testing, ESLint, Prettier, Agile, Code Reviews

EXPERIENCE

Career Break | Health Recovery, Family Responsibilities & Upskilling

Sep 2025 – Present

- Strengthened React.js and JavaScript skills; acquired Next.js and TypeScript through hands-on SaaS development.
- Architected and deployed InsightAI — multi-tenant SaaS dashboard with 3-tier subscriptions, PostgreSQL RLS, and 6+ reusable modules.
- Ranked Top 30% among 2,989 participants at OpenAI × NamasteDev Codex Hackathon 2026.

Software Engineer | FugetronCorp — Mumbai, MH

Jan 2025 – Sep 2025

- Built core approval and reporting features for an enterprise financial workflow platform using React.js, React Query, and Redux Toolkit, enabling reliable processing of high-value business transactions across 5+ approval tiers.
- Designed and delivered 3 mission-critical modules—Quarterly Report, Reports, and Print—from scratch, producing audit-ready documentation and eliminating manual reporting bottlenecks end-to-end.
- Implemented multi-level approval workflows and RBAC across 5+ approval levels, enforcing secure authorization and reducing manual approval errors.
- Developed dynamic reporting dashboards with real-time search, filtering, and assignment management, improving workflow visibility and reducing operational turnaround time.

Web Developer | Melot Technologies Pvt. Ltd. — Mumbai, MH

Oct 2023 – Dec 2024

- Developed high-performance React.js UI components for a live-streaming platform serving 10M+ users, ensuring cross-browser and cross-device consistency while mentoring a junior developer to maintain release quality.
- Integrated REST APIs across 3 products — StreamKar PK Agency, Spotlight, and OyeTalk — delivering event scheduling, PK battle mechanics, leaderboards, and event-winner pages supporting 10+ live events.
- Built Google Sheets automation pipelines for live event operations, eliminating manual result tracking and cutting post-event reporting time for the coordination team.

Frontend Developer | Unifo Private Limited — Chennai, TN

Aug 2021 – Sep 2023

- Delivered 5+ enterprise features, including Flat File Generation, Checklist Generation, Advanced Search & Filtering, and Line Item Calculation with multi-currency conversion, owning end-to-end frontend implementation across product modules.
- Developed reusable React.js interfaces using JavaScript and Redux, managing complex application state and integrating REST APIs to deliver scalable, maintainable user experiences.
- Streamlined 3+ business workflows using React.js, Redux, and REST APIs, improving data accuracy, reducing manual effort, and enhancing maintainability across enterprise product modules.

PROJECTS

InsightAI — Multi-Tenant SaaS Analytics Dashboard [React.js](#) · [Redux Toolkit](#) · [React Query](#) · [Supabase](#) · [PostgreSQL](#) · [Tailwind CSS](#) · [Recharts](#) [Live Demo](#)

- Architected a multi-tenant SaaS platform with Supabase RLS, enforcing company-level data isolation across all tenants.
- Built end-to-end authentication, RBAC, and team invitation workflows across 3 subscription tiers (Trial, Pro, Enterprise), enabling full access-control lifecycle from sign-up to billing.
- Delivered 6+ reusable frontend modules — Analytics, Projects, Notifications, Activity Logs, and AI Insights — via a shared component library, accelerating feature delivery across the product.
- Optimized bundle via code splitting and lazy loading; integrated Recharts for responsive data visualizations, reducing initial load time and improving dashboard responsiveness.

ACHIEVEMENT

OpenAI × NamasteDev Codex Hackathon (2026) — Ranked in the **Top 30%** of **2,989 participants** by independently developing InsightAI, a production-grade multi-tenant SaaS analytics dashboard. [View Certificate](#)

EDUCATION

Master of Computer Application | Vellore Institute of Technology — Vellore, TN

Jul 2019 – May 2021

Bachelor of Computer Application | Makhanlal Chaturvedi National University — Bhopal, MP

Jul 2015 – May 2018
