Summary

Frontend Developer with 4+ years of experience building scalable web applications using React.js, JavaScript, Redux Toolkit, and React Query. Experienced in developing enterprise financial platforms, reporting dashboards, and high-traffic consumer applications with a focus on performance, usability, and maintainable code.

Career Break: Took a short planned break for health recovery and am now available to join immediately.

Technical Skills

Languages: JavaScript (ES6+), HTML5, CSS3

Frontend: React.js, Next.js

State Management & Routing: Redux, Redux Toolkit, Context API, React Query

Technologies & Tools: Linux, Git/GitHub, RESTful APIs, Material UI, Styled-Components, Tailwind CSS, React Router

Experience

Software Engineer

Jan 2025 – Sep 2025

FugetronCorp

Mumbai, MH

- Developed key features for an enterprise financial workflow platform using React.js, React Query, and Redux Toolkit, supporting approval and reporting processes for high-value business transactions.
- Designed and built Quarterly Report, Reports, and Print modules from scratch, enabling accurate reporting, audit-ready documentation, and efficient business operations.
- Implemented multi-level approval workflows and role-based access controls, ensuring secure review and authorization processes aligned with business requirements.
- Developed reporting dashboards with search, filtering, assignment management, and report generation functionality, improving visibility and tracking across operational workflows.

Web Developer

Oct 2023 – Dec 2024

Melot Technologies Private Limited

Mumbai, MH

- Developed responsive, high-performance UIs for a 10M+ user streaming app, ensuring cross-device compatibility.
- Built event-driven modules with API integrations, scheduling, and leaderboard features for StreamKar (PK Agency, Spotlight, OyeTalk).
- Optimized event workflows by integrating Google Sheets data and developing event winner pages using React.js.
- Improved code quality and performance by mentoring a junior developer and resolving API and UI bottlenecks.

Front End Developer

Aug 2021 – Sep 2023

Unifo Private Limited

Chennai, TN

- Built dynamic SPAs with React.js and JavaScript, leveraging Redux for complex state management.
- Developed scalable backend features with Node.js and Hapi.js, creating RESTful APIs for frontend-backend communication.
- Maintained high code quality via code reviews, knowledge transfer sessions, and refactoring guidance.
- Ensured stable releases through thorough testing, debugging, and on-time delivery under tight deadlines.

Projects

AI SaaS Dashboard — <https://ai-dasboard.vercel.app/> *React, Redux Toolkit, Supabase, Tailwind CSS, Recharts*

- Developed a multi-tenant SaaS analytics platform using React.js, Supabase, and PostgreSQL with company-based data isolation and Row Level Security (RLS).
- Implemented secure authentication and Role-Based Access Control (RBAC) using Supabase Auth, protected routes, and Admin/Manager/Analyst/Viewer permission tiers.
- Built event tracking and management modules with full CRUD functionality, real-time data updates, advanced filtering, and analytics reporting.
- Integrated AI-powered insights and dashboard visualizations using React Query, REST APIs, and Recharts to deliver actionable business metrics across devices.

Education

Vellore Institute of Technology

July 2019 – May 2021

Master of Computer Application

Vellore, Tamil Nadu

Makhanlal Chaturvedi National University of Journalism

July 2015 – May 2018

Bachelor of Computer Application

Bhopal, MP
